2015 Draft Amendments to *Connect Spokane*:

A Comprehensive Plan for Public Transportation

3.2 Benches

STA shall work with local authorities to ensure that bus benches are placed properly, designed adequately, and serve the needs of customers sufficiently.

Benches provide comfort for all types of passengers. Although local jurisdictions are responsible for the operations and maintenance of bus benches, coordination with STA increases the likelihood that everyone's needs are being met. Generally, STA recommends bench locations which meet one of the following criteria:

- 1) 10 or more weekday average boardings
- 2) Transfer point between two or more routes
- 3) Adjacent to ridership generator with a high proportion percentage of riders with limited mobility

**2015 Draft Amendments to *Connect Spokane:*
*A Comprehensive Plan for Public Transportation***

3.3 Shelters and Awnings

The placement and maintenance of shelters or other weather cover for passenger waiting areas where appropriate shall be encouraged

STA shall work with local and regional jurisdictions to position bus shelters, awnings and other weather protection which can encourage ridership by protecting waiting patrons from adverse weather elements. Shelters also provide an appropriate location for posting important ridership information. Stops with new shelters will comply with the Americans with Disabilities Act. Stops to have shelters funded by STA must meet at least one of the following criteria:

- 1) 25 or more weekday average boardings
- 2) Transfer point between two or more routes
- 3) Adjacent to a ridership generator with a high proportion percentage of riders with limited mobility
