

GRAND BLVD

The Grand Boulevard Transportation and Land Use Study has officially kicked off! You are receiving this notification because you live or own property near or within the map area shown here.

The City is seeking your input for a new vision that will inform possible streetscape, transportation, and land use changes in the planning area including the business district along Grand Boulevard south of 29th Avenue.

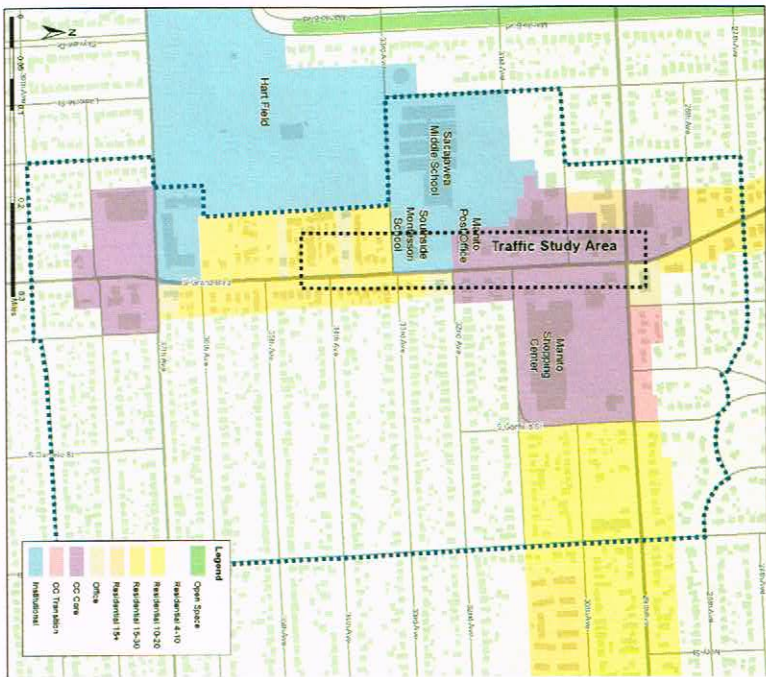

Spokane's South Hill continues to be a vibrant area in the Spokane community, the area is seeing continued public and private investment.

As the neighborhoods around the Grand Boulevard business district continue to grow, the City wants to be sure to support opportunities for sustainable improvement and growth in this area. This study will develop recommendations to address the anticipated needs and growth of this neighborhood business district.

You are invited to participate in an online survey. All are encouraged to respond, especially those who live, work, or engage in the Grand Boulevard planning area! Your feedback will be used at a second open house in early 2020.
